

Congratulations!

You are the proud owner of a beautiful piece of lovingly created art made in Canberra, Australia by Sophie Kristine of Oh Little Spark Art.

This is an ink and watercolour illustration! To make it I carefully drew my design using found items like leaves, feathers, flowers, skulls, or other miscellaneous items or reference pictures, then ink them up to form an outline. I then used Winsor and Newton Artists watercolours to hand colour the image. I sell original ink and watercolour illustrations, as well as prints.

If you are purchasing a print it has been professionally printed locally onto Hahnemühle Photo Rag which has a heavyweight, fine, smooth matte texture. It is Acid free, Calcium Carbonate buffered, archival museum grade. Weight - 188gsm, signed and editioned.

You can see time lapsed process videos on my social media, you might be lucky enough to see yours being made!

About me: I'm a Canberran born and bred, self-taught, native flora and fauna loving artist who enjoys nothing more than being immersed in the beauty of nature. Although I was always surrounded by great artists, I only started to dabble myself upon inheriting a portion of my grandmothers vast art supplies in 2015. Not one for dainty or petite, I favour ink, watercolour and the boldness of loud Lino prints which complement the unusual creatures I come across while out bushwalking. I particularly enjoy native birds, flowers and insects – they're generally not particularly subtle and I think my preferred mediums capture their character very well.
